I took some photos of the map. Give me a call so I can explain. I'm working on getting you a real map.

What we need:

Review QASP

Make sure we have adequate analyses to assess the pesticides on-site

Recommend the frequency (area/distance) to collect samples along the areas with "X" on the map

Recommend another background sample location in the easement (in addition to the background sample at the West Elementary School in the lower left hand corner of the map)
